Summary

Driven Data Analyst with expertise in analyzing, visualizing, and modeling complex datasets to deliver actionable insights. Skilled in building interactive dashboards, automating data pipelines, and optimizing business intelligence processes to support data-driven decisions..

Technical Skills

- **Data Analysis & Visualization:** Python (pandas, NumPy, matplotlib), R (ggplot2, dplyr), SQL, Excel, Tableau, Power BI
- **Data Management:** Data Cleaning, Data Integration, Data Mining, Quality Control
- **Statistical Analysis:** Predictive Modeling, Trend Analysis, Hypothesis Testing
- **Business Intelligence:** Interactive Dashboards, Data Reporting, KPI Analysis, Performance Metrics

Professional Experience

Data Analyst Intern
Prwatech Project | June 2024 – September 2024

- Developed **interactive dashboards** using Tableau and Power BI to visualize admissions trends, student demographics, and key business insights.
- Extracted, cleaned, and managed large datasets using SQL and Excel to deliver accurate and timely reports.
- Led analytical initiatives to evaluate KPIs, improving course pricing strategies, integrating relevant topics, and enhancing student engagement.
- Collaborated with cross-functional teams to streamline data systems, ensuring continuous improvement and optimization of reporting tools.

Education

Bachelor of Science in Computer Science and Statistics
Nrupathunga University | Graduated September 2024
CGPA: 7.2
